

Meeting with Client (Bob Rand & Rhema Bjorkland)

Date: Friday April 25th at 5:00pm

Discussion on Fixing GIS Shapefile Map

- Bob Demonstrated critiques to delineated map:
 - Wants Franklin Park tracts to be more visible (specifically 8067.13 and 8067.14)
 - Then break up each tract into blocks
 - This would give historical data for 1980 to 2010
 - Doesn't mind keep block in greenbelt that only take up a portion → no modifications needed for this
 - Walked through the data utilized that is incorporated into the shapefile
 - IPUMS NHGIS queries used
 - Range of years
 - Census tract
 - Hispanic origin
 - ^Bob shared these shapelines to be used
- Bob wants Ruchir and Khoa to clean the data
- Bob is interested in having the shapefile show more details in terms of house
 - He is not sure if this is possible with the technology and data used
- **Final Presentation May 20th**

Next Steps:

- Could include recommendations for going forward at the end of the presentation
